

Get Started with Gemini Gems

What are Gems?

Gems are customized versions of Gemini that help you tackle repetitive tasks or get deep expertise in new areas. When you chat with a Gem, Gemini will tailor responses to save time on repeat goals and guidelines in your Gemini web app and Gemini mobile app prompts.

Create a new Gem

- On your device, go to gemini.google.com.
- On the left, click Explore Gems and then New Gem.
- Name your Gem and write instructions for it to follow. Use the tips below to write great Gem instructions.

			
Persona	Task	Context	Format
Tell your Gem what role to play and how to respond.	Tell the Gem what you want Gemini to do or create.	Provide as much background as possible.	Be specific when specifying desired structure.

- On the right, you can enter a prompt to preview your Gem. After you preview the Gem, make sure to click Save. Using the preview window does not automatically save your Gem.
- Click Save.

GEM TIP

Use Gemini to help write your instructions. When you create your Gem, you can use Gemini to help re-write and expand on your instructions. In the instructions box, write a sentence or two describing your goal. Click Use Gemini to re-write instructions. Review and edit the instructions.

Share a Gem

- You can share your Gems for others to use or copy.
- On your computer, go to gemini.google.com.
- On the left, click Explore Gems.
- This opens your Gem manager.
- Find "My Gems" and select the Gem you want to share.
- You can share by adding people or give "General access."
- Select "Anyone with the link" and toggle "Viewer".
- Copy the link and Select "Done".
- Paste the link where you want to share it.
- Your shared Gems are saved in the Gemini Gems folder in your Google Drive.

Customize a premade Gem

Where you can customize a premade Gem:

- You can copy some premade Gems as a starting point and customize it for your specific needs.
- On your computer, go to gemini.google.com.
- On the left, click Explore Gems.
- Under "Premade by Google," find the Gem you want to customize and click Make a copy.
- Edit the Gem's name.
- Review and edit the Gem's instructions to better fit your needs.
- Click Save.
