

Google Vids

Create and collaborate with video at work—all right in your browser.

AI features in Vids, such as "Help me create," read-along teleprompter and AI voiceover, are only available in English at this time.

1

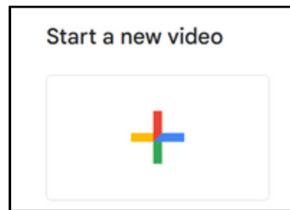

Go to Vids: vids.google.com

Google Vids

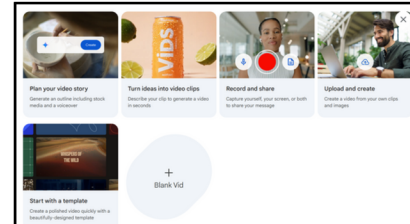

2

Click Start a new video.

3

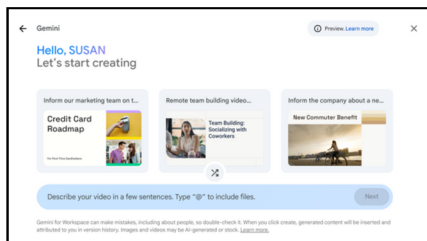

In the pop-up, click Plan your video story.

4

Enter a prompt or click a suggested prompt.

- To improve the output quality of your video, you can add related google files: Enter @, then add the file name or select from the list of suggested files.
- To generate new suggested prompts, under the list of text prompts, click Shuffle .

Explore Vids!

5

Click Next to generate your video.

- After your outline has been generated, to edit it, update the tiles that represent each scene.
- Once you have a final outline, choose a design for your video.
- After you create your video, you can continue to edit or customize.
